

Mohit Lalwani

+91 8871157253 | mohitlalwani1409@gmail.com | [LinkedIn](#) | [GitHub](#) | Pune, Maharashtra

Summary

Third-year B.Tech Computer Science and Business Systems student with hands-on experience in data analytics, machine learning, and business intelligence. Proficient in Python, SQL, Excel, and data visualization tools with demonstrated ability to extract actionable insights from complex datasets. Passionate about driving data-driven decisions and delivering client impact.

Education

MIT World Peace University, Pune	2023 – 2027
<i>B.Tech Computer Science and Business Systems</i>	CGPA: 7.01
Christ Church Boys' School, Jabalpur	2023
<i>CBSE Class XII</i>	70%
Christ Church Boys' School, Jabalpur	2021
<i>CBSE Class X</i>	86.2%

Skills

Programming & Analytics: Python, SQL, R (basic), C, C++

Data Analytics & ML: Pandas, NumPy, Scikit-learn, SMOTE, Statistical Analysis, Data Preprocessing, Model Evaluation

Visualization & Reporting: Matplotlib, Seaborn, Chart.js, Microsoft PowerPoint, Microsoft Excel

Databases: MySQL, SQL querying, schema design

Web & Tools: Flask, React.js, Node.js, REST APIs, Git, GitHub, Jupyter Notebook, VS Code

Soft Skills: Analytical Thinking, Cross-functional Collaboration, Problem Solving, Client Communication, Stakeholder Presentation

Projects

Credit Card Fraud Detection System [GitHub](#) Python · Scikit-learn · Pandas · SMOTE · Matplotlib · SQL

- Built an end-to-end ML analytics pipeline on a real-world financial dataset to identify high-risk fraudulent transactions, mirroring the kind of data deep-dives required in biopharma commercial analytics.
- Handled severe class imbalance using SMOTE and applied feature scaling, ensuring robust model performance on skewed real-world data.
- Trained and benchmarked Logistic Regression and Random Forest models; evaluated business impact using precision, recall, and F1-score to surface actionable recommendations for fraud minimization.
- Visualized key risk patterns and model performance metrics using Matplotlib to communicate findings to non-technical stakeholders.

AI Investment Predictor [GitHub](#) Python · Flask · LSTM · Yahoo Finance API · Keras · Matplotlib

- Developed a full-stack analytics application that retrieves real-time financial data, applies LSTM forecasting models, and surfaces BUY/SELL recommendations—demonstrating end-to-end insight delivery to end users.
- Implemented moving average trend analysis and built an interactive dashboard for live price tracking and visual insight generation.
- Optimized Page loading speed by caching popular stocks in memory and utilizing browser LocalStorage to let users save custom stock watchlists.

Faculty Leave Management & Dynamic Lecture Reassignment Portal [GitHub](#) React.js · Node.js · Express.js · MySQL · Chart.js

- Built a full-stack portal automating faculty leave approvals and lecture reassignment, eliminating manual coordination workflows via MySQL schemas, REST APIs, and real-time scheduling queries.
- Designed an admin dashboard with Chart.js visualizations giving coordinators live visibility into scheduling conflicts and coverage gaps—connecting operational data directly to decision-making.
- Worked across a cross-functional team to gather requirements from multiple stakeholders and deliver a production-ready solution.

AcademiQ – Academic Advisor Chatbot [GitHub](#) HTML · CSS · JavaScript · Claude API

- Built a client-side AI-powered chatbot leveraging the Anthropic Claude API with 6 specialized advisory modes (Study, Exams, Career, Writing, Stress, General), demonstrating ability to design custom AI solutions around user needs.
- Designed a responsive, user-friendly interface with dynamic system prompts, translating complex AI capabilities into accessible, actionable tools for end users.

Positions of Responsibility

Contributing Member, Smart India Hackathon 2025

Sept 2025 – Oct 2025

- Conducted research and integration of AI/ML technologies for a national-level problem statement under time and resource constraints.
- Contributed to development, analysis, and stakeholder presentations during internal evaluation rounds.

Sponsorship Head, AWS Cloud Club

Dec 2024 – Aug 2025

- Led sponsor outreach and partnerships for technical events, developing structured sponsorship packages and managing external stakeholder relationships.
- Coordinated logistics across cross-functional teams, demonstrating planning and communication skills aligned with Blue Matter's multi-office collaborative culture.

Achievements & Certifications

- Internal Final Round Qualifier – SIH, MIT World Peace University (2025)
- Data Science Training Certificate – Bharatskillz
- Java Training Certificate – MIT WPU
